What Will I Learn in Ceramics?

Students will understand what clay is and where it comes from

**What is clay?**

- Clay is a soft, moist, earthy material that is made from eroded rocks.

Students will build ceramic forms using the slab building technique:

Ceramic “Box Project”

Students will use a variety of clay tools and methods in my creative work.

Students will build ceramic forms using the coil building technique:

Ceramic Teapot

Ceramic Mug

Students will develop my 8 Studio Habits of Mind:

- Develop Craft
- Engage & Persist
- Envision
- Express
- Observe
- Stretch & Explore
- Reflect
- Understand Art Worlds

Students will create functional pottery pieces:

Ceramic Kiln Firing

Ceramic Glazing

Students will learn kiln firing and glazing techniques:

Students will create utilitarian works in clay.

Students will create sculptural works in clay.

Students will communicate interesting ideas with clay.

Students will create ceramic works that reflect their personal vision.
